FACING HIVES.

A Bee Keeper Tells in Which Direction Beehives Should Front. In which direction ought beehives to

front, is a question of importance and one that does not appear to have received nuch consideration from agricultural writers. The opinions based on personal experience and expressed recently by an Iowa bee keeper in The American Bee Journal will be of interest to apiarians.

I would not advise setting shade trees very thick. It is from personal experi-ence that I write. I have been experimenting in this direction for about ten years, and I think that I have come to a conclusion that is satisfactory to me. I cannot control my bees in a hot or sul-try, close place, for they will hang out on the fronts of the hives and at a loss of honey, or at my expense. The better the honey flow the warmer is the inside of the hive, so it would be well for us, even in this latitude, not to choose too hot a place for the hives. If I should have any slope at all it would be in any

direction except south.

On the other hand, early spring is very trying; at this time of the year we should do all we can to save the old bees, for if we accomplish this, other things being favorable, we will have plenty of brood, and plenty of bees to gather the clover honey. For hours in the spring of 1888 I watched, with much interest, the little bees fly from the cozy and well protected apiary, on which the direct rays of the sun rested, causing the bees to take wing in great numbers. Over the willows they flew, with the temperature at 45 degs., though there were clouds at times, and chilly northern breezes. If my bees had been on the north side of the willows, they would not have been out,

taking the chances. I had one row of hives fronting north, and where the cool breezes could strike the entrance; these bees did not dwindle to any extent, while those in the sun, and facing south, though protected from the wind, dwindled down on the average of one-third of the bees. Thus it may be seen that if the white clover had yielded a surplus, I would have been the loser of ndreds of pounds of honey. In short, I think quite positively, that it is not best to carry bees from any repository, and front their hives to the south, in a sunny and close yard.

Coops for Chickens. You have probably often noticed on the premises of those who have limited room, that when it came time to have a number of broods of young chickens, it was impossible to raise them, unless their lawns and gardens were spoiled and disfigured with all sorts of contrivances to keep the young broods from doing mischief, and to protect them from cats and other enemies, besides from being killed

COOP WITH COVERED BUN. H. H. Stoddard, in his work on poultry architecture, presents the plan represented in the first cut, by which each hen with her chickens can be kept by themselves, the hen having the advantage of scratching in the run. The run is made of common hemlock boards and lath. The end toward the coop is open, and the front of the coop is also open. The boards at the bottom are 5 inches wide and at the top 2 inches. The end is separate, as are, also, the two sides. They can be tied together with twine, and when you are done using them they can be taken apart and put away in a

When you have need of twenty or twenty-five such runs, it is a great advantage to have them made in sections, so as to be able to pack them away in a small space. The bottoms of the coops are loose, and can be taken out and cleaned when necessary; also, the runs can be renewed with fresh sand occasionally, or removed to a new site. The runs cost twenty-two to twenty-four cents each, if you make them yourself.

A WELL VENTILATED COOP. In the second cut may be found a good suggestion for a coop of simple and convenient arrangement. Its advantages, according to Mr. Stoddard, are so apparant as to require few words of explanation. The outer frame or door is covered with wire netting and hung upon two pivots. The pivots being above the center allow the door to close of itself. At the bottom of the opening, just back of the slats, is nailed a small strip, against which the inside bottom edge of the door strikes and is prevented from going further. Its convenience will pay for mak-

For Curculio and Codling Moth. The repeated experience of some members of the Ohio Horticultural society appears to have proven that, for the curculio and codling moth, 1 pound of Paris green or London purple to 150 gallons of water is a sufficiently strong solution, and that where a larger proportion of the poison is used the foli-age is liable to be injured. For the per-fect destruction of the canker worm a stronger solution is necessary. In some orchards badly affected by this pest, the best results have been obtained by the use of a solution containing I pound of use of a solution containing I pound of the poison to 40 or 50 gallons of water, applying this with considerable force in the form of a very fine spray. Some of the members have used Paris green for the currant worm, but a large majority disapproved of this as unnecessary and dangerous; unnecessary because white dangerous; unnecessary because white bellebore is just as efficient and is per-

The Earl of Caithness, fifteenth of his title, whose death was announced recently in London, in the 3fst year of his age, will be remembered in America as Lord Berriedala. He visited this country some ten years ago with his father, the late carl. Both peers were men of much scholarly attainment.

Mr. John Mayo, of Dooly county, Ga., is a splendid shot. He is an invalid, and sits in the door of his house and shoots lizards from his fences with a rifle. He shoots crows on the wing with a pistol. When he has bogs killed a negro man jumps astride of a hog, catches hold of both ears of the animal and turns its head toward Mr. Mayo, who will shoot it in the head with his rifle.

THE MILD LOOKING MAN.

He Was Willing to Answer to the Name

"Ha! Caught you at last, have IF" The tall, powerful man who uttered these words stood in the center of a group at a street corner in a far western town. As he spoke he brought his hand down heavily on The tall, powerful man had previously

winked at the bystanders.
"You don't remember me, I s'pose?" be continued, with a fierce frown, as he tightened his clutch on the stranger's shoulder.
"Why, no; I can't say I do," replied the
mild looking man, looking at him wonder-

ingly.
"You've forgot all about the time you leaned out of a car window of a train jest pullin' out of Cheyenne and knocked my hat "I certainly don't remember anything of

"I never saw you before."

the kind," protested the bewildered stranger.

"O, yes you did! You may have forget it, but I haven't." And he emphasized the assertion by a vigorous shake. "I haven't forget it, and I've said a thousand times since hen that if I ever met you agin I'd make looking stranger, stooping to pick up his hat, which had fallen to the ground during the shaking process, "it seems to me I do remem-

ber something of the kind. I suppose I am bound to give you satisfaction for it. Put up time. Placing himself in an attitude of de-fense, he danced about the big man in a way startingly suggestive of previous practice.
"Before I mop the sidewalk with you," said the other, "I want to be sure I ain't mis-

blow neatly on his antagonist's jaw. "Certainly! Snaggs will do as well as anything Snaggs it is!" "But, hold on! I want to be dead sure! The man I'm lookin' fur is Jerusalem Snaggs!"
"You've found him, my friend," exclaimed
the stranger, as he banged him on the nosa. "I'm Jerusalem Snaggsi" he continued, making a feint with his left and administering a

vicious upper cut with his right. "Oh, yes, I am Snaggs [biff] from [whack] Snaggsville, Snaggs county [bang], near the head waters of Snaggs creek. Office hours from 1 to 24. Come early and avoid the rush!"

With a final blow under the ear he laid the burly fellow flat on the ground. As he turned to go he said:

"My name, gentlemen, is Jerusalem Snaggs, of course, but for convenience sake I go around under an alias." And he took from his vest pocket a card and threw it on the prostrate body of the big man. After he had gone away somebody picked it up and read:

It's hard to beat.—Omaha World.

Brodie Braves Niagara

A Clifton telegram Ontario, of Sept. 7th says: Steve Brodie went over Horse Shoe Falls this morning in a rubber suit. He was picked up below the falls in an unconscious condition and taken to Clifton, where he recovered consciousness not long afthe shoulder of a mild looking stranger who ter. He is not seriously injured. In was passing by and turned him half way company with several special friends and newspaper correspondents the venturesome hero arrived last night. They left at 4 o'clock this morning and went to a place twenty feet above falls. Brodie then stripped, his body was padded with cotton and he put on a rubber suit which was inflat-He had on a headgear also inflated, while two steel bands protected his body. At 5:30 a. m. Brodie entered the water, and a few moments later shot over Horse Shoe Falls. Luckily he was shot with lightning rapidity over the outside of the falling columes of water, and was quickly lost in mist and foam. He was buried from view nearly two minutes. When he appeared on surface a rope was atyou apologize or fight." tached to him, he was drawn ashore "Now that I think of it," said the mild and quickly stripped. Brandy was poured down his throat in small quantities till he recovered conscious ness. Blood oozed from his mouth, nose and ears, probably in consequence of the shocks sustained. For twenty His bewildered look had all gone by this minutes Brodie lay motionless until ammonia was applied to his nostrils, and he began to revive. His injuries beneficial to the whole Territory .are not serious. He expects to go to

New York to-morrow. In describing his experience Brodie taken. Your name is—is Snaggs, ain't it?"

"Snaggs?" replied the stranger, planting a says: "After I entered the river I weakened and would have given anything in the world if I could have reached the shore." He attempted to get ashore by using his paddles, when the swift current swept him back and turned his feet toward the brink of the cataract. Just as he came to the brink of the cataract he became unconscious through fright and remained so until he struck the water at the base of the falls, when he was temporarily brought to by the force with which he struck. He then again lost consciousness and knew no more until he found himself lying on his rubber suit at the water's edge. There is no doubt that Brodie successfully went over the falls of Niagara and lives to tell the story, but he is not likely to try the feat again.

The Beef Problem. On several occasions we have spoken of the unreasonable and unjust difference between the price of the beef as paid the farmers and the price the same is retailed at in the cities and towns. The difference is from 8 to 12 cents per pound and sometimes more. Speaking of this subject, a Dallas, Texas, stock raiser writes: "I think it will be apparent to all who consider this beef problem that the present low prices, apparently caused by overproduction, is mainly attributable to the high retail price demanded from the consumer. The average retail price of beef is about eighteen cents per pound, and the question presents itself, can the laboring masses use this commodity as an article of food? It appears that the retail butchers, proportion to the cost of beef on foot, apparent overproduction." The prominence that has recently

Buttes near Florence, bids fair to re land and insure it against any possible drouth. It seldom happens that nature brings together such a com-bination of the elements of wealth as the Florence Bakery.

Proclamation of Reward. To ALL TO WHOM THESE PRESENTS MAY come, greeting:
WHEREAS, I am informed that on or about the first day of July A. D., 1889, a Pima Indian named Ha-li-pa, was shot and killed on the public road between Phenix and Tempe, this territory, by some person or persons unknown.

Now, therefore, I, Lewis Wolfiey, Governor of Arizona, by virtue of the power within me vested, do offer and proclaim a reward in the sum of Three Hundred (300) dollars, to be paid by the Territory of Arizona, for the arrest and conviction of the person or persons who committed the erime of assaulting and killing the said Pima Indian, Ha-li-pa.

In witness whereof I have hereunto set my hand and caused the great scal of the Territory to be affixed.

Done at Phenix the Capital this 18th day of August, A. D. 1889.

By the Governor.

NATHAN O. MURPRY.

Secretary of Tarritory. TO ALL TO WHOM THESE PRESENTS MAY
